Abdominal stomas and their skin disorders : an atlas of ...

Background Skin integrity is essential for the normal usage of a stoma appliance. However, there is little published on the prevalence, nature or management of stoma-related skin disorders. Objectives To document stoma-related skin disorders in a large cohort of patients. Methods We sent a postal questionnaire to all surviving patients who had had abdominal stoma surgery at Hope Hospital, Salford, U.K. in the 10 years from 1 January 1989.

This innovative handbook bridges the gap between the colorectal surgeon, the stoma nurse and the dermatologist. It addresses the questions of what pathology is involved, what can be done by nurses, when to refer to a dermatologist, and what can be done by a dermatologist. Now in its second edition,

Intra-Abdominal Cystic Lymphangioma: Report of 21 Cases

Studying in a retrospective review of 21 cases, diagnostic, therapeutic and evolutionary aspects of intra-abdominal cystic lymphangioma (CL). Methods: Between 1992 and 2014, 21 patients were operated at our institution for a CL. Clinical presentation, location, surgical management and outcome were studied. Results: There were 14 women and 7 men.
