Engineering Mechanics Problems - Real World Physics Problems

Chapter 6 deals with the special theory of Relativity. Problems are solved under Lorentz transformation of length, time, velocity, momentum and energy, the invariance of four-momentum vector, transformation of angles and Doppler effect and threshold of particle production. Chapters 7 and 8 are concerned with problems in low energy Nuclear physics.

Kinematic Equations: Sample Problems and Solutions

Engineering is the application of scientific knowledge in order to design, build, and maintain structures, machines, devices, systems, materials and processes. Engineering is often used to develop and create new technology. Many real world problems are sufficiently complex such that an engineering approach is required to solve them.
