The application allows users to:

- Capture requirements specifications

Product requirements document - Wikipedia

A specification is a text document that identifies stakeholders, its own history and potential previous approvals. Apart from that, a functional specification needs to include: Project scope – the goals, deliverables, features, tasks, costs, and deadlines of the project.

Software Requirements Specification (SRS Document) | Perforce

The requirements are then analyzed by a (potential) maker/supplier from a more technical point of view, broken down and detailed in a Functional Specification (sometimes also called Technical Requirements Document).

Functional Requirement Specification Document

A software requirements specification (SRS) is a document that describes what the software will do and how it will be expected to perform. It also describes the functionality the product needs to fulfill all stakeholders (business, users) needs. A typical SRS includes:

What Goes Into a Functional Specification?

The purpose of a functional specification is to define the requirements to be implemented by the software solution. Now, as business analysts, not all aspects of our solutions are software-based. A perfectly legitimate solution to a business problem could involve a business process change, organizational change, or even a configuration adjustment.
