Packaging and Shipping Information - Micron Technology

2.1 Tape & Reel † DIN IEC 60 286-3 The components are placed on a plastic tape (carrier tape) made of polystyrene or polycarbonate, with correspondingly shaped recesses in its surface, which is then sealed with a cover tape (transparent foil).

Surface Mount Device (SMD) Tape and Reel - Maxim Integrated

The tape is wound and shipped on reels. The table and diagram on this page indicate the tape sizes used for various package types and the basic orientation convention used. Further tape-and-reel specifications can be found in the Electronic Industries Association (EIA) Standard 481. Tape and Reel Packaging Information

Plastic IC Package Information - Diodes Incorporated

- The reel is made of polystyrene (PS) plastic material and typically coated with antistatic solution.
- The carrier tape is made of standard polycarbonate or polystyrene materials.
- The cover tape is made of polyester material.
- The cover tape uses pressure sensitive or heat activated adhesive.

Packaging, Tape and Reel Information

Embossed Tape and Reel is used to facilitate automatic pick and place equipment feed requirements. The tape is used as the shipping container for various products and requires a minimum of handling. The antistatic/conductive tape provides a secure cavity for the product when sealed with the “peel-back” cover tape.

Tape and Reel Packaging Standards - ON Semiconductor

Electronic Tape and Reel Packaging Services. With tape and reel packaging, Tintronics Industries has the ability to organize the parts you give us in bulk so that they're ordered sequentially and are more convenient for access and use. We

specialize in surface mount, radial, and axial tape and reel types that can be applied towards anything from organizing and reeling bulk components to box-packing ammo and lead straightening.

Packaging Support Documentation - Diodes Incorporated

This customer service note describes the standard shipping quantity, box quantity, and types such as tape and reel for Micron's products. Download. Packaging Information. CSN-16: Micron Component and Module Packaging. Customer Service Note (PDF) - 10.13.2020. Explanation of Micron packaging labels and procedures.

Bing: Packaging Tape And Reel Information

Packaging Information. Our packaging system protects our products from mechanical and electrical damage, and our Tape & Reel and tray packing system are designed for automatic pick-and-place equipment.

Packaging Tape And Reel Information

The "C" dimension of Fig. 2 is between flanges of the component reel and shall be 1.5 mm (0.059") to 8.00 mm (0.315") greater than the overall taped component width "W" (Fig. 1). Where "W" dimension is 68.2 mm (2.68") max.

Tape and Reel LTC - Analog Devices

Tape and Reel Packaging Standards Embossed Tape and Reel is used to facilitate automatic pick and place equipment feed requirements. The tape is used as the shipping container for various products and requires a minimum of handling. The antistatic/conductive tape provides a secure cavity for the product when sealed with the "peel-back" cover tape.

Custom Packaging Tape - MaverickLabel.com

TAPE AND REEL PACKAGING FOR SMD-4 OPTOCOUPERS WITH OPTION 9
Dimensions in millimeters Selected 4 pin optocouplers are available in tape and reel format. To order any SFH6xx6 op tocoupler on tape and reel, add suffix "T" after the part number, i.e., SFH6156-3T. The tape is 16 mm and is wound on a 33 cm reel. There are 1000 parts per reel.

Automated Tape and Reel Packaging - YouTube

The preferred packing material available today for these demands is tape and reel. Analog Devices' tape and reel system is fully compatible with the detaping equipment that is standard in most automated placement equipment. In the tape and reel format, the components are placed in specifically designed pockets embossed in a plastic carrier tape.

Packing - Infineon Technologies

In many sectors and applications today, Tape and Reel has become an important alternative packaging method for trays or tubes. One advantage is that each reel contains more components than a tray or tube, which can drastically reduce your assembly down time. Another is the importance of SMT products arriving to the customer without damage.

Tape and Reel

Tape & Reel Packaging Information KEMET offers multilayer ceramic chip capacitors packaged in 8, 12, 16 and 24 mm tape on 7" and 13" reels in accordance with EIA Standard 481. This packaging system is compatible with all tape-fed automatic pick and place systems. See Table 2 for details on reeling quantities for commercial chips.

Tape and Reel | Component Packaging | Advantek

Tape and Reel Tape and Reel is a process of packing surface mount devices (SMD's) by loading them into individual pockets comprising what is known as a pocket tape or carrier tape. The units are sealed in the carrier tape with a cover tape, usually by heat or pressure. The carrier tape is wound around a reel for convenient handling and transport.

Tape and Reel Specifications and Packaging Specifications

Tape and Reel Packing Tape and reel packing is available for all SO, TSOT (thin SOT- 23), SOT-23 3L/4L, SOT-223, SSOP, TSSOP, QFN, DFN and DD packages in accordance with EIA Specification 481-D with the following exceptions : (DFN(DCB), TSOT and SC70 pin 1 is placed into quadrant 2.

Tape and Reel Packaging - Analog Devices

Advantek is the world's leading provider of precision component packaging systems. Learn about the areas in which we protect, shield, and present devices.

Tape & Reel Packaging Information - KEMET

Custom Packaging Tape Information. Custom printed sealing tape is a great way to advertise your brand on every package you ship. It's more economical than branding your boxes or other packaging, and makes a great impact statement. Print your custom artwork in up to 3 from 15 standard ink colors, or specify up to 3 PMS colors to match your ...
