Sentaurus Process is an advanced 1D, 2D and 3D process simulator for developing and optimizing silicon semiconductor process technologies. It is a new-generation process simulator for addressing the challenges found in current and future process technologies. Equipped with a set of advanced process models, which include default parameters calibrated with data from equipment vendors, Sentaurus Process provides a predictive framework for simulating a broad range of technologies from nanoscale ...

Right-click the gray box immediately below the Sentaurus Process icon in the main window of Sentaurus Workbench, and select Add. In the Add Parameter dialog box, enter the fields as shown in Figure 1. Click OK. Figure 1. Add Parameter dialog box. Repeat the above procedure to create another parameter called penergy with the default value of 40. The main window of Sentaurus Workbench should now look like Figure 2.
